

Arrowwood III Association Newsletter

January 2024

Upcoming Dates

- Jan 10 – AIA Homeowner & Board Meeting
- Jan 20 – NEPCO General Meeting

happy new year

The next AIA III board meeting will be on January 10th, at 7pm. Details on the website. All homeowners welcome.

Road Maintenance

As we all know, winter is not gentle on our streets. The freezing and thawing can cause or enlarge potholes and cracks. If you identify a neighborhood road that is in need of repair, you can take action! Note where the issue is at, snap a photo on your phone and then go to the El Paso County Citizen Connect website (<https://citizenconnect.elpasoco.com>) to “submit a service request”. El Paso County also offers a mobile phone app called “EPC Citizen Connect” for faster and easier request submissions. Help us keep AIA roads in better repair by letting the County officials know when service is required! Thanks!

NEPCO Opportunity

Arrowwood III is a member of the Northern El Paso County Coalition of Community Organizations where information and feedback is exchanged with state, county and local government entities, on issues affecting quality of life. Monthly general meetings are open and topics include land use, road planning, water issues, and emergency services. The NEPCO Board of Directors is inviting interested persons from any constituent HOA to attend Board meetings in the capacity of a Board Observer. This position provides the opportunity for individuals to observe the NEPCO Board, participate in discussions, and fully engage in deliberations. If you are interested, visit the nepco.org website today!

Snow Plowing Changes

If you haven't heard, El Paso County has made changes to the residential neighborhood snow plowing policies. This change means that Arrowwood III roads are priority level three and will not be plowed quickly, or sometimes at all. You can read more at: <https://publicworks.elpasoco.com/road-bridge/snow-plowing>

Natural Gas Line Surveys

In the next month, you may see Black Hills Energy crews on our streets identifying and labeling underground natural gas lines. This surveying work will not affect our gas service, but crew members may walk into our yards or knock on our doors for difficult to access meters and lines.
