

With the proper fire mitigation actions, your property can be saved when a wildfire occurs.

A Few Recommended Actions:

Clean out pine needles from gutters and in a 30ft. perimeter surrounding your house

Remove combustible materials such as firewood and gasoline from under or close to your house

Remove ladder fuels in your lot. If an ember catches dried grass or other vegetation on fire, that flame will grow 6 feet above the source. If the flame catches our forest canopy on fire, we are toast.
